Funding dedicated to the security of infrastructures and maritime transport

The call for projects "Border Management 2022 (HORIZON-CL3-2022-BM-01)" supports research and innovation actions for solutions that allow the detection of anomalies or threats under the water surface when the ship enters the port or is at the quay. The proposed solutions should contribute to improving: -the security of seaports and their access routes; -the detection of illegal and dangerous goods; -the detection of anomalies hidden under the water surface, whether they threaten infrastructure or ships, or whether they are moving alone or linked to ships.

The project requires the participation as beneficiaries of at least 3 border guards or coast guards from at least 3 EU Member States or associated countries. More information on this call: <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/horizon-cl3-2022-bm-01-02>
